

THE M-203PI UNIVERSAL 40mm GRENADE LAUNCHER SYSTEM

A combat-proven 40mm system made for law enforcement needs.
The M-203PI easily mounts on all rifles in your inventory.

PRECISE ACCURACY REDUCES LIABILITY, LOWERS AMMUNITION COSTS AND INCREASES SAFETY.

Now law enforcement agencies can have the advantages of highly accurate 40mm firepower. Virtually any police rifle or sub-gun can easily be equipped with this advanced, patented grenade launcher system. R/M Equipment manufactures the military-proven M-203PI grenade launcher with a quick-connect system that allows the M-203PI to be snapped on and off a rifle or sub-machine gun as easily as changing magazines. A mounting interbar is attached to the rifle within the handguard and does not affect normal rifle operation.

The M-203PI launcher can also be snapped onto a lightweight, folding-stock pistol unit, which allows it to be carried compactly and used without a rifle. The pistol can even be carried in a leg holster. The M-203PI can be moved quickly and easily between a rifle and a pistol unit. The M-203PI works with virtually all the rifles you have in inventory. This means the M-203PI can be shared by officers who carry different rifles and exchanged as needed. Cross-training becomes easier and is not limited by hardware.

With the M-203PI there are no dedicated grenadiers. Any team member can have multiple functions for maximum operational flexibility and safety. The M-203PI lets you select from the largest variety of ammunition, allowing you more and safer tactical options. There is no longer any reason to continue to use surplus weapons and outdated designs. The M-203PI gives you maximum safety, consistently dependable accuracy, complete flexibility in your operations and is available for quick delivery now.

The M-203PI is cost effective. One M-203PI can work as a shoulder-fired launcher and a rifle-mounted launcher. Whether you're replacing surplus 40mm guns or upgrading from 37/38mm, the M-203PI is your best choice. The M-203PI also provides convenient under-barrel mounting points on your rifle for a laser aiming light or flashlight. Now, accessories can snap on and off your rifle as easily as the launcher.

HIGHLY ACCURATE, SAFER TO USE, PROVEN RELIABLE, POWERFUL, FLEXIBLE, AVAILABLE NOW.

Now **tactical requirements**, not hardware, allow team commanders to determine:

- when launchers will be issued, as the M-203PI is not permanently attached to the rifle.
- which officers will have both rifle and M-203PI launcher capability on mixed operations.
- the visible, tactical profile of officers, as the M-203PI can be carried apart from the rifle, out of sight, until needed.

Multiply the effectiveness of your team with the M-203PI, a proven weapon system, improved for use now and into the future.
